

Gyro compass - GC80 series

Our Gyro compass family

Accurate heading information for all onboard instruments.

"Our unique range of gyrocompasses eliminates the need for annual servicing and ensures accurate heading information."

We provide a sophisticated range of gyrocompasses for professional applications. Designed to be the most flexible gyrocompasses on the market in terms of installation, configuration and costs, the GC80 Series gyrocompass range gives vessels the added advantage that no annual servicing is required.

Additionally, we provide as standard 2 years warranty on all gyrocompasses, including sensitive elements to underline the unique reliability.

This is the ideal gyro system for any kind of vessel that either needs an IMO approved gyro system or can go with the compact "all-in-one" RGC50 gyrocompass which has been a big success for many years for non-IMO users.

No annual servicing

Self contained, maintenance free sensitive elements

Full range of accessories

An Azimuth circle for use on the bearing repeaters and a full range of accessories is available

Quick installation

Complete flexibility of system configuration for new installation and easy retrofit into existing repeater systems
