

Handheld VHF HT50/53

The perfect connection, designed for rough, daily use

Simrad handheld VHF radios have earned a strong reputation for their robust construction and dependable reliability. They are highly prized by coast guards, rescue services and defence agencies.

The radios are waterproof to 1 meter immersion, even with the battery removed. They are also drop proof to 1 meter.

HT50 and HT53 share all the same basic features, while HT53 is perfect when operation requires an external speaker microphone, headset or helmet.

Features:

- When turned on, channel 16 will automatically be selected
- Memory scan for easy monitoring of commonly used channels
- Battery indicator and operating status displayed on easy to read LCD
- Supplied with 1200mAh NimH battery. 12V charger and mains adapter.
- Clip on battery for easy replacement

The chrome plated brass connector on the HT53 is sturdy enough to withstand rough use

When turned on, channel 16 will automatically be selected.

Memory scan for easy monitoring of commonly used channels.

The HT50 range is supplied with a powerful 1200mAh NimH battery. 12V charger and mains adaptor.
