

## RD68 dVHF – compact unit with DSC

The RD68 is a full class 'D' DSC radio capable of sending and receiving all calls the yachtsman requires. Simple connection to a GPS receiver via NMEA the input ensures that the distress call will send your exact position. The RD68 is offered with an active fist microphone.

### Transmits:

- Distress Call
- Individual routine calls
- All Ships Safety call
- All Ship Urgency call
- Group call (for flotillas or racing)

### Receives:

- All above calls and acknowledgements
- Individual Safety Call
- Individual Urgency Call
- Distress Relay Call

*May require approval for operation, which might not be granted in all countries. Contact your local distributor for details.*

## RT64 VHF

### Voice only VHF

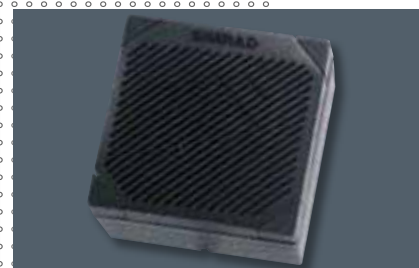

For users requiring voice telephony only, we offer the RT64. Built to the same high standards as the RD68, this radio provides all the facilities of a radio telephone, including the full range of scan facilities. The RT64 can be provided with an active fist microphone.

*Dot matrix. Large, clear back lit LCD and soft keys for intuitive operation.*

*The distress key is protected from accidental operation by a spring loaded cover.*

*Optional external loudspeaker.*
