

CHARTPLOTTERS

567, 557, 550(i)

Navigation is easy with Northstar's Explorer Series dedicated chartplotters...

A simple-to-use menu structure and superb daylight viewable screen means you can enjoy your voyage whether it's across the bay or across an ocean. Rugged and waterproof, the Northstar Explorer is a brilliant choice for your navigation needs.

EXPLORER CHARTPLOTTER FEATURES:

READY-TO-GO AIS CAPABILITY

Automatic Identification System (AIS) is ready-to-go on the 567 and 557, allowing you to identify and avoid AIS-transmitting vessels in hazardous visibility conditions.

See page 19 for more information.

FUEL MANAGEMENT

Every Northstar Explorer series chartplotter has a built-in fuel computer. Just purchase the optional fuel kit to display fuel management data such as fuel flow, fuel remaining, estimated range and fuel economy.

A graphical fuel gauge complements this digital information,

Northstar Explorer series chartplotter come SmartCraft™-ready - a fantastic feature for boats with compatible Mercury, MerCruiser and Mariner engines.

EXPLORER 557

The built-in 32 MB regional background map on the Explorer 557 still offers reliable entry-level use, waiting to be enhanced with C-Map's latest cartography: NT MAX™.

With a 640 x 480 pixel screen, chart display becomes 4 times sharper than the 550, making the 557 very easy on the eye.

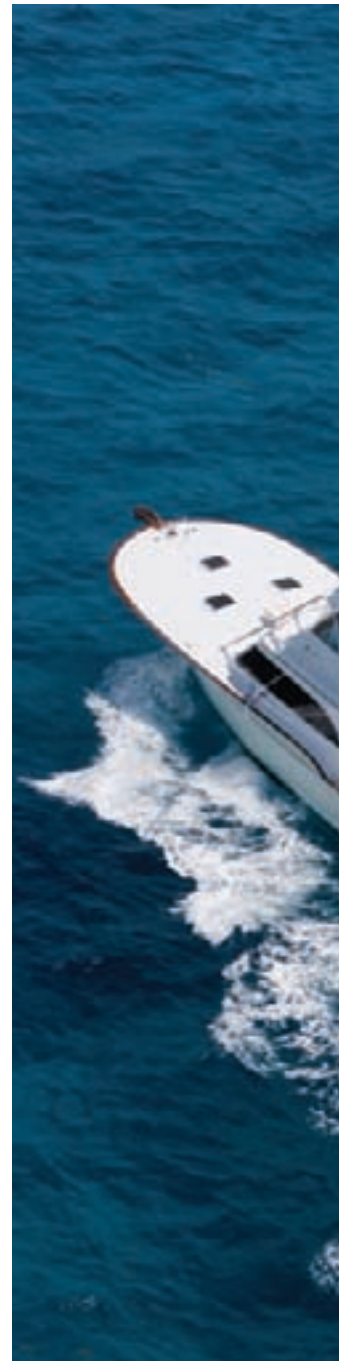

EXPLORER 550

The Explorer 550(i) presents large screen functionality at an attractive price. Powerful C-MAP NT MAX™ features are brought to life on the 5" 320 x 234-pixel daylight viewable color screen.

With fuel computer software installed, the Explorer 550(i) offers a complete fuel management system for gasoline or SmartCraft™ enabled engines.

The 550(i) comes in two types: internal GPS receiver or external. These great chartplotters are perfect for boats of all sizes.

MODEL	PART
EXPLORER 567	
with 124 GPS antenna	NS002941
EXPLORER 557	
with 124 GPS antenna	NS002911
EXPLORER 550(i)	
550i - integrated antenna	NS002965
550 - with 133 GPS antenna	NS002961
ACCESSORIES	
Rail mount bracket for Explorer chartplotters	AA002295
Rail mount clip for GPS antenna	AA002296

* Requires optional fuel kit/SmartCraft™ gateway; see pages 14-15 for details

** Requires input from Explorer 721; see page 30 for details

‡ Products with integrated antennas can only be bracket mounted.

EXPLORER 567

The Explorer 567 offers the ultimate in dedicated Northstar Chartplotters - a full 6.4" VGA ultra-bright screen for critical detail close to shore.

The 567 offers enhanced AIS and fuel management capabilities as well as the opportunity to add fantastic NT MAX™ cartography from C-Map.

Northstar's ease-of-use philosophy is lead by the Explorer 567's user interface design. The intuitive MENU key uses situation logic to display options dependent on the current situation. Have you just set a waypoint? Then the first menu option is GOTO.

Here at Northstar we call it the "Smart Key" because it knows what you are doing and offers the logical choice for all situations.

Match this unit with the Explorer 467 for a big twin screen chart/fish set-up.

CHARTPLOTTER SUMMARY	567	557	550(i)
